## **CARORAM 70 HS**

**2020**

**CARORAM 70 HS** is a high alumina, heat setting, plastic refractory. Excellent spall resistance, good load bearing properties and high refractoriness are some of its features. CARORAM 70 HS is ideal for walls, roofs, and burner blocks in boilers, forge furnaces and incinerators. Again, patching in rotary kilns and electric furnace delta sections are other applications.
