

**CARORAM 85 G**

2020

CARORAM 85 G is a high alumina, graphitic plastic. CARORAM 85 G has been designed to resist molten metal and slag attack in the most severe conditions. Typical applications in blast furnaces and high production cupolas are troughs, runners, and skimmers and the breast, taphole, and runners.

Maximum recommended service temperature..... 3300°F

Melting Point..... 3225°F
